

ANADROMOUS SALMONID PROTECTION WATERSHEDS (FPR §§ 916.9, 936.9, 956.9)
QUESTIONNAIRE TABLE – CLASS II WATERCOURSE TYPING

DATE: _____ SUBMITTED BY: _____

TOTAL NUMBER OF PLANS: _____ TOTAL ACREAGE OF PLANS _____

PLAN NUMBERS AND COUNTY(S): _____

A	Total Number of individual Class II watercourse segments flowing directly into Class I watercourse segments associated with all Plans reviewed? (Note: it is the actual Class II segment flowing into the Class I that we are tallying not all the smaller tributaries to this segment.)					
B	Total Number of individual CLASS II-L watercourses flowing into Class I watercourse segments associated with all Plans reviewed? (This is a subset of item 'A' above.)				% B/A	
C	Total number of CLASS II-L watercourse segments, identified in item 'B' above, by stream order (1 st , 2 nd , 3 rd or greater Order as defined in § 895.1)?	1 st	2 nd	≥3 rd		
		% C/B	% C/B	% C/B		
D	Estimated total combined length (in feet) of all CLASS II watercourse segments (Standard and Large) in all Plans reviewed?					
E	Estimated total combined length (in feet) of all watercourse segments receiving CLASS II-L protection measures in all Plans reviewed?				% E/D	
F	Total number of CLASS II watercourse segments, identified in item 'A' above, by stream order (1 st , 2 nd , or 3 rd or greater order as defined in § 895.1)?	1 st	2 nd	≥3 rd		
		% F/A	% F/A	% F/A		
G	Total number of CLASS II-L watercourses, identified in item 'B' above, by estimated acreage of contributing drainage area (to where the Class II-L intersects with the Class I)?	<50 ac.	50-99 ac.	100-149 ac.	≥150 ac.	
		% G/B	% G/B	% G/B	% G/B
